

Company profile

CMP ITALIA is a company that specializes in the braze welding of metal parts suitable for the conduction of cooling gas.

Their experience in this field enables them to carry out tasks of high precision, with the assistance of special prototype machinery.

CMP ITALIA is highly qualified in the production of coils for refrigeration compressor and calking, braze welding and bending of capillary tubes.

CMP ITALIA works in collaboration with TI Group Automotive System SpA Bundy to study and produce the finished serpentine

Products

Some typologies of working realized by CMP ITALIA where the precision and the quality of the process developed stand out.

Processing

The production procedures adopted by CMP ITALIA in the different stages of product realization are characterized by:

- careful attention paid to the quality of the materials used
- the use of special machinery and furnaces
- special accuracy in the working out of each single process.

The machines used are all prototypes. The metal elements are accurately worked in the customer's own project.

Calking and braze welding with copper paste are carried out in furnaces equipped with conveyor belts and burning vestibules, enabling the retrieval of energy for annealing and brazing.

Work is carried out in conditions in strict accordance with the regulations concerning the safety and the health of workers in their workplace (legislative decree 626/94).
